# Introduction

In Maryland, as in the rest of the United States, the work to advance economic mobility and independence has evolved dramatically in the post-pandemic economy. Transformative economic shifts, driven by rapid technological innovation and the long-term impacts of the Great Recession, global pandemic, and other economic headwinds, have reshaped the landscape of education and employment. Earning an industry-recognized credential in addition to a high school diploma is increasingly critical to success in a growing range of jobs, including entry-level opportunities. In recognition of this reality, Maryland is committed to expanding pathways to credentials and family-sustaining careers, including through registered apprenticeship and career and technical education (CTE) pathways.

The Governor's Workforce Development Board's (GWDB's) CTE Committee and the Maryland State Department of Education (MSDE) recognize the importance of building greater alignment between education and workforce needs - including through modernizing the state's approach to conferring high-value industry-recognized credentials that meet the demands of our state's economy and lead to pathways to work, wages and wealth. With a myriad of these credentials offered across each CTE program of study in the State, discerning and transparently articulating their real-world value is a complex but crucial task. Maryland is part of a national movement of 26 states incorporating industry-recognized credentials into their high school accountability measures. The CTE Committee is charged with making critical decisions on how these credentials are being identified, assessed and awarded under the Blueprint for Maryland's Future ("the Blueprint").

This publication lays out a joint GWDB CTE Committee-MSDE framework for Maryland's educational and workforce development leaders to identify high-value industry-recognized credentials with clarity and conviction. It calls for a collaborative approach to ensure transparency and clear alignment on messaging to students, caregivers, educators, and employers.

The most essential criterion for high-value industry-recognized credentials is unequivocal: they must be a conduit to employment that ensures a family-sustaining wage. Achieving this standard requires a unified effort from industry, workforce development, K-12, and postsecondary education leaders to identify and endorse the credentials that align with the needs of the labor market, particularly in high-skill, high-wage, and in-demand fields. Encouraging learners to attain these credentials, coupled with meticulous data collection and reporting, is imperative. Our leadership must guide more students, especially those from historically marginalized and underserved communities, toward quality credentials as a steppingstone to work, wages and wealth. The vitality of Maryland's economy and keeping the State's promise to leave no one behind hinges on our commitment to this endeavor.

<sup>&</sup>lt;sup>1</sup> USDOE, Bridging the Skills Gap: Career and Technical Education in High School, September 2019, https://www2.ed.gov/datastory/cte/index.html

# **Purpose**

The Blueprint for Maryland's Future ("the Blueprint") establishes a goal that by the 2030-31 school year, 45% of public high school graduates will have completed the high school level of a Registered Apprenticeship or another industry-recognized credential by the time of graduation. The intention of this goal is to ensure that students graduate from high school with the knowledge and skills required to be successful as they enter college or begin their career, and that they be on a structured career pathway at the time of graduation.

The Blueprint goes on further to state that, to the extent practicable, the CTE Committee shall ensure that the largest number of students achieve the requirement of this subsection by completing a high school level of a Registered Apprenticeship. This requires the creation of a CTE system that offers rigorous high school apprenticeships as the primary industry-recognized credential that produces graduates ready and qualified to work within in-demand fields.<sup>2</sup> Every graduate of a Registered Apprenticeship program receives a nationally recognized credential, referred to as a Certificate of Completion.<sup>3</sup> Therefore, completers of the "high school level of a Registered Apprenticeship" as stipulated in the Blueprint, will go on to earn an industry-recognized credential as they complete the Registered Apprenticeship after graduation.

The Blueprint requires that the GWDB CTE Committee define the apprenticeships and industry-recognized credentials that count toward the 45% goal.4 The CTE Committee and the Maryland State Department of Education (MSDE) recognized that it would be essential to align around one definition, set of criteria, and list of approved industry-recognized credentials that both MSDE and the CTE Committee recognize for Perkins V funding and under the Blueprint's 45% goal, respectively. As such, the CTE Committee and MSDE examined national best practices and gathered input from a range of stakeholders to inform the development of an aligned definition, set of criteria, and approval process.<sup>5</sup> The CTE Committee received over 140 responses to a public feedback survey on the original proposed industry-recognized credential definition and criteria. Feedback received was representative of a wide variety of stakeholders, including Local Education Agencies (LEAs), workforce boards, employer and industry associations, and post-secondary (see Table 1 below). This feedback informed a thoughtful analysis and revision of the final definition and required criteria as presented in this framework.

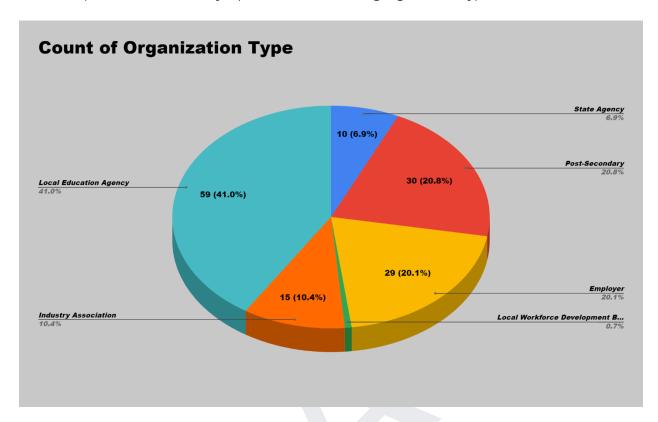

<sup>&</sup>lt;sup>2</sup> AIB's Comprehensive Implementation Plan, updated August 2023, https://bit.ly/3U0YBf9

 $<sup>^3</sup>$  This portable credential signifies that the Apprentice is fully qualified to successfully perform an occupation. Many Registered Apprenticeship programs, particularly in high-growth industries such as healthcare, advanced manufacturing, and transportation, also offer interim credentials as apprentices master skills at each stage of their Registered Apprenticeship.

<sup>&</sup>lt;sup>4</sup> Per the CTE Committee's apprenticeship framework, the "high school level of a Registered Apprenticeship" will be defined as completing the high school portion of a School-to-Apprenticeship (STA) program before graduation, and STA will be the preferred "gold standard" method of fulfilling the 45% goal. [insert link once posted]

 $<sup>^{5}</sup>$  For more information on this national landscape review of other state models, review the original draft of the IRC framework presented to the CTE Committee on November 29, 2023. www.gwdb.maryland.gov/ctecomm/ctecomm-ircnov2023.pdf

Table 1: Respondents to the survey represented the following organization types:

# **Defining Industry-Recognized Credentials**

The Blueprint for Maryland's Future requires that the CTE Committee define which industry-recognized credentials (IRCs) count toward the 45% goal (i.e. that 45% of public high school students complete the high school level of a registered apprenticeship or an industry-recognized occupational credential before they graduate).

#### **SCOPE**

The CTE Committee and MSDE have worked together to develop one definition and list of approved IRCs that both MSDE and the CTE Committee will recognize. The following definition, core criteria, application process, and list of state-approved IRCs will be recognized for the purposes of:

- The CTE Committee reporting on the Blueprint's 45% goal; and
- MSDE will recognize this for approving post-College and Career Readiness pathways and for federal Perkins reporting.

As the CTE Committee has been engaging various stakeholders in this process, there are considerations for future implications for which this IRC definition and criteria may be applied. However, for the purposes of this publication, the following definition and criteria apply to the items listed above.

#### **DEFINITION**

An industry-recognized credential (IRC) is a formal validation of an individual's skills and/or competencies that align with state or regional in-demand occupations and is recognized by industry and employers. It includes a certification, license, or credential that is obtained through an assessment process, is portable, and may be stackable. The IRC leads to documented positive employment outcomes, ensures relevance to the labor market, and supports career advancement and economic development.

#### **CORE CRITERIA**

Industry-recognized credentials must meet each core criteria listed below:

- 1. Aligns with In-Demand Occupations: The credential is associated with occupations that are in high demand or emerging within Maryland as defined by the Governor's Workforce Development Board (GWDB) using state labor market data and employer feedback, or as defined as a regional need or emerging credential by the local workforce development board.
- 2. **Provides Documented Outcomes:** There is evidence of positive employment and wage outcomes for individuals who have obtained the IRC, demonstrating its effectiveness in contributing to workforce readiness and economic advancement.<sup>6</sup>
- 3. Validated by Industry: The credential is recognized by multiple employers within an industry sector and is developed or endorsed by industry associations when applicable, ensuring its relevance and value in the job market.

<sup>&</sup>lt;sup>6</sup> In cases where the credential does not lead to a living wage job, or where data is not yet available, the credential should show that it can be stacked with other credentials, exhibiting progression in a career pathway with positive wage outcomes; or that it meets criteria #1 since it leads to an in-demand occupation.

- 4. Assessment-Based: The credential is awarded upon successful completion of an assessment process that may include written, oral, or performance evaluations, demonstrating the individual's mastery of specific knowledge, skills, and abilities required for a particular occupation or skill area.
- 5. Standards-Driven: The credential is based on industry-accepted standards for skills and competencies, ensuring that it reflects the current needs and practices of the relevant industry.
- 6. Attainable and Accessible: The credential is attainable by high school students through secondary, postsecondary, or other training programs and is accessible to a wide range of learners, including special populations, to support equity and inclusion in access to attainment of industry-recognized credentials.7
- 7. Portable: The credential can support employment in more than one region of the state and, where applicable, outside the state.

It is preferable for the industry-recognized credentials to also meet these additional criteria, but these are not a requirement for approval:

- 8. Stackable: The credential can:
  - a. be transferred seamlessly to postsecondary work through acceptance for credit or hours in core program courses at an institution of higher education;
  - b. be counted toward hours in an aligned Registered Apprenticeship program; or
  - c. be part of a prescribed coherent sequence of industry-recognized credentials that show progressive skill development and qualify credential earners for professional advancement within their industry.
- 9. **Renewable:** Where applicable, the credential is renewable, requiring holders to engage in continuous learning or re-assessment to maintain the credential's status and relevance.

 $<sup>^{7}</sup>$  USDOE defines the term "special populations" within the Carl D. Perkins CTE Act of 2006, https://www.govinfo.gov/content/pkg/COMPS-3096/pdf/COMPS-3096.pdf

# **Application Process for New Industry-Recognized Credentials**

Local Education Agencies (LEAs), Community Colleges, Local Workforce Development Boards (LWDBs), and other organizations in Maryland must submit an application for industry-recognized credentials not already approved for use across the state. This section details the requirements for requesting an industry-recognized credential's approval, timelines for the application process, and alternative routes to approval for credentials unique to local and regional labor markets.

The electronic application for a new Industry-Recognized Credential may be accessed by clicking here.

### CREDENTIALS UNIQUE TO LOCAL WORKFORCE NEEDS

There may be instances in which industry-recognized credentials emerge that bring great value to local or regional employers but do not meet the full criteria for inclusion on the CTE Committee-MSDE listing of qualified statewide credentials. Local applications for credentials unique to local workforce needs must be verified by the LWDB in partnership with the LEA; submissions made by LEAs, Community Colleges, or other organizations without the support of the Local Workforce Development Boards will not be considered. The expectation is that the application and supporting documentation will be submitted as a collaborative effort between the LWDB, LEA, and/or Community College.

As a part of the submission, requesting organizations must provide supporting documentation to help MSDE and the CTE Committee assess whether the credential satisfies the criteria for local demand. Supporting documentation includes, at a minimum:

Documented support from the LEA, such as the associated CTE local advisory council (LAC), and the LWDB. The documented support must make a compelling argument that the credential is necessary for entry-level positions and is valued and supported by local employers.

#### **TIMELINE**

The timeline for making requests and for the formal approval process is detailed in the table below.

| Date       | Description   |
|------------|---|
| August 1   | Online application for new industry-recognized credentials <b>opens</b> .   |
| October 31 | Online application for new industry-recognized credentials <b>closes</b> .  |
| November   | Maryland State Department of Education (MSDE) reviews each submission for completeness and follows up with requesting entities to gather any additional information needed to make a recommendation to approve or not approve.  |
| December   | MSDE prepares submission packages for each industry-recognized credential application meeting foundational application requirements, including a recommendation to <b>approve</b> or <b>not approve</b> the IRC. All packets and recommendations will be sent to CTE Committee staff by December 31st for review by the full Committee. |

| Date    | Description  |
|---------|--|
| January | The CTE Committee will formally vote to <b>approve</b> or <b>not approve</b> each IRC package provided to them by MSDE. Once a formal determination is made, MSDE will notify the requesting entity of the status via email. Each approved IRC will be added to the state-approved IRC roster on July 1st for use in the upcoming school year. |
| July 1  | MSDE will publish the annual State Approved Industry-Recognized Credential list.   |

# **Review Process for Existing Industry-Recognized Credentials**

To ensure the relevance and quality of Industry-Recognized Credentials (IRCs) within Career and Technical Education (CTE) programs, the Maryland State Department of Education (MSDE) collaborates closely with the CTE Committee to conduct a comprehensive review of existing IRCs. This biennial review process is a cornerstone of Maryland's commitment to aligning CTE programs with the evolving needs of the industry and the labor market. The following narrative outlines this collaborative review process.

Every two years, with 2024 marked as the inaugural year, MSDE and the CTE Committee embark on a strategic review of the IRCs currently included in the state's CTE programs. This systematic and collaborative process ensures that each credential remains relevant, meets the high-quality standards expected by the industry, and aligns with the state's workforce development goals.

#### **Step 1: Data Collection and Analysis**

The review process begins with MSDE collecting data and feedback on the utilization, outcomes, and perceived value of each IRC from a variety of stakeholders, including educators, students, industry partners, and workforce development professionals. This step may involve analyzing employment trends, wage data, and job placement rates for credential holders, as well as soliciting feedback through surveys and focus groups.

### Step 2: Labor Market Information (LMI) Review

Simultaneously, the Governor's Workforce Development Board (GWDB) in collaboration with MSDE conducts an in-depth analysis of current LMI to identify emerging trends, skills demand, and potential gaps in the state's workforce. This analysis helps in assessing whether the existing IRCs continue to align with economic development strategies and labor market needs.

#### **Step 3: Collaboration with the CTE Committee**

With this foundational data in hand, MSDE collaborates with the CTE Committee, comprising representatives from education, industry, and labor, to review each IRC against the established Framework of Quality for CTE programs.8. This collaborative effort ensures a comprehensive evaluation from multiple perspectives, emphasizing the credential's relevance, quality, and contribution to student success.

#### **Step 4: Stakeholder Engagement**

MSDE and the CTE Committee engage with stakeholders to discuss the findings of their review and gather additional insights. This engagement may take the form of public forums, workshops, or targeted meetings with industry advisory boards, ensuring that the review process benefits from a wide range of expertise and viewpoints.

### **Step 5: Decision Making and Implementation**

Based on the analysis, stakeholder feedback, and collaboration between MSDE and the CTE Committee, decisions are made regarding the continuation, modification, or removal of IRCs from the state's CTE programs. This step ensures that the credential offerings remain dynamic and responsive to the needs of both students and employers.

 $<sup>^{8}</sup>$  The CTE Committee and MSDE are collaborating on the development of a statewide CTE framework. This framework is forthcoming in mid-2024.

### **Step 6: Communication and Support**

Following the review, MSDE communicates the outcomes to all stakeholders, providing clear rationales for decisions made. Additionally, MSDE offers guidance and support to CTE programs affected by any changes, ensuring a smooth transition and maintaining the integrity of the CTE offerings.

# **State-Approved Industry-Recognized Credentials**

Beginning July 1, 2025, the Maryland State-Approved Industry-Recognized Credentials meeting all required core criteria are listed in the table below.9 Once approved, MSDE will publish the annual State Approved Industry-Recognized Credential list on a publicly available website in a format that can be downloaded.

| Career<br>Cluster                 | IRC<br>Code | Credential<br>Name                                  | Issuing<br>Entity |
|-----------------------------------|-------------|---|-------------------|

| Arts, Media, and<br>Communication | 11018       | Adobe Certified Associate Animate                   | Adobe             |

<sup>9</sup> As of the release of this publication, there are several credentials that are still being evaluated. At the time of publication, these credentials were missing required information to be approved. The CTE Committee and MSDE will be closely reviewing these credentials in spring 2024 and updating the list accordingly.

| Career                          | IRC   | Credential  | Issuing   |
